

SHREYA EBY

AI & DATA SCIENCE ENGINEERING STUDENT

Engineering student exploring the intersection of AI, Data Science and Emotional Intelligence to create human-centered technologies. Strong interest in research, innovative ideation, and applying best practices to develop impactful and scalable solutions.

AWARDS

Special Jury Award [Global Healthcare Ideathon 2024]

YIP 2019-2022

[Kerala Startup Mission and K-DISC]

Qualified for "Technovation Girls" (2021) – International Level

3rd National Robotics Championship [NRC India in association with Innovation Cell, IIT Bombay]

ATL Student Innovator 2019 [by NITI Aayog and ATAL Innovation Mission]

2nd in Amrita National Science Olympiad 2019

2nd Prize in Ideathon TECHFOSS 2022 [Toc H Institute of Science and Technology]

EDUCATION

BTECH- AI AND DATA SCIENCE (Currently Pursuing)
(Hons. in AI Security) 2024-2028 Batch

- 2nd Year : SEMESTER 4
- CGPA: 9.05
- Honors in AI Security

PROJECTS

AI & EQ Sentiment Capture Project JP Morgan Chase || 2026

PROBLEM STATEMENT:

A gap between resource availability and active participation, necessitating a shift from passive consumption to active contribution.

SKILLS ACQUIRED:

Google AI Studio, Human-Centered Design, Research Analysis and Implementation

Smart Care Application- Social Enterprise for the Elderly Technovation Girls || 2021

PROBLEM STATEMENT:

Elderly populations face barriers to independence due to non-intuitive assistive technologies.

SKILLS ACQUIRED:

Mobile App Development-Thunkable,
Business Plan, Revenue Generation Methodologies

SKILLS AND EXPERTISE

TECHNICAL SKILLS

- Machine Learning and Model Training
- Data Analysis & Interpretation
- AI Prototyping & MVP Development

PROGRAMMING & TOOLS

- Python & Data Preprocessing
 - NumPy, Pandas
 - Matplotlib, Seaborn
 - Scikit-learn
- Hugging Face
- Google AI Studio
- Canva(Design & Presentations)
- GitHub
- Kaggle (Datasets & Practice)
- Google Teachable Machine
- PictoBlox (AI/ML Integration)

CORE SKILLS

- Presentation & Communication
- Human-Centered Design
- Research-Oriented Approach
- Problem Solving
- Analytical & Critical Thinking
- Collaborative Leadership
- Cross-Functional Collaboration

- **PARKI CHAIR-Holistic Solution for the Parkinson Disease affected individuals**
K-DISC, KSUM || 2019-2022

PROBLEM STATEMENT:

Elderly and immobile patients struggle with daily activities and independence due to the lack of accessible, multi-utility smart support system

SKILLS ACQUIRED:

Business Canvas, Research & Development, Healthcare Innovation, Tinkercad basics, Project Presentation Skill, Customer Analysis

- **Stabilizing spoon for parkinson's patients**
ATAL Innovation Mission || 2018

PROBLEM STATEMENT:

Design a device to counteract hand tremors in Parkinson's patients, enabling them to eat independently

SKILLS ACQUIRED:

Arduino, Hardware Prototyping, Problem Solving ,Sensor Integration(MPU6050)

- **Object Detection and Image Model Training**
1st Year College Project || 2024

PROBLEM STATEMENT:

Build a real-time object detection game that allows users to identify objects using clues and earn points

SKILLS ACQUIRED:

Model training (Google Teachable Machine), Model Evaluation and Integration, PictoBlox (AI/ML Integration)

PROFESSIONAL DEVELOPMENT

- **Google Student Ambassador 2026**
–May 2026 onwards
- **Gemini Certification for University Students**
from Google
- **Machine Learning Using Python**
from Amal Jyothi College of Enginnering
- **ChatGPT Prompt Engineering for Developers**
from DeepLearning.AI and OpenAI
- **Collaborative Writing and Coding with OpenAI Canvas**
from DeepLearning.AI and OpenAI
